STANDARD OPERATING PROCEDURE: FINISHED PRODUCT COMMERCIAL BATCH RELEASE

Document: SOP-QA-GMP-882 | Department: Quality Assurance & Analytical Chemistry | cGMP

Section 1.0 — Analytical Release Criteria for CardioVastin Tablets

Every commercial batch of CardioVastin 20 mg tablets must meet the following validated release specifications prior to QA QP (Qualified Person) sign-off under 21 CFR Part 211:

1. Active Ingredient Purity (HPLC): Must be **>= 98.5%**. Total related impurities must not exceed 1.0%.

2. In Vitro Dissolution Rate (USP App 2, 50 rpm): Not less than **85% dissolved within 30 minutes** in pH 6.8 phosphate buffer.

3. Total Aerobic Microbial Count (TAMC): Less than **100 CFU/g**. Absence of Escherichia coli and Salmonella.

Section 2.0 — Lot 4891 Release Investigation Verdict

Batch Verification Summary: Lot 4891 achieved **99.2% purity**, an average **88.5% dissolution at 30 minutes**, and a microbial count of **12 CFU/g**. All parameters fully conform to release specifications. The lot is certified and approved for commercial pharmaceutical distribution.
