SUPPLIER QUALITY ADVISORY & RECALL NOTICE

Issuing Vendor: Apex Fluid Dynamics Inc. | Bulletin Ref: APX-QB-2024-03

Subject: Premature Degradation in High-Pressure Seal Batch **BATCH-APEX-24Q1-A** (Part AFD-SEAL-882)

Apex Fluid Dynamics has identified a curing inconsistency in nitrile elastomer batches dispatched between January 15, 2024 and March 1, 2024. Affected seals exhibit an elevated defect rate of **1,850 PPM**, leading to micro-tearing at pressures exceeding 175 bar.

Corrective Recommendation: Customers utilizing batch BATCH-APEX-24Q1-A on continuous assembly lines should quarantine uninstalled inventory and replace installed seals during next scheduled shift downtime.
