US FOOD & DRUG ADMINISTRATION (FDA) — SUMMARY BASIS OF APPROVAL

Center for Drug Evaluation and Research (CDER) | Application Number: NDA 218492 | Drug: CardioVastin

1. Executive Regulatory Action Summary

The FDA has granted formal marketing approval for **CardioVastin (20 mg oral film-coated tablets)** as an adjunct to diet alone or in combination with statins for adults with primary hyperlipidemia and established atherosclerotic cardiovascular disease.

2. Clinical Evidence Verification

Approval is grounded in pivotal Phase 3 Study CV-301 (N=1,200), demonstrating a robust **48.4% reduction in LDL-C** ($p < 0.0001$) and statistically significant reductions in Apolipoprotein B (-39.2%) and non-HDL-C (-44.1%).

3. Post-Marketing Commitments & Pediatric Exemption

The sponsor must conduct a post-approval 5-year Major Adverse Cardiovascular Events (MACE) cardiovascular outcomes trial (CVOT). No Boxed Warning (Black Box) was required by CDER due to favorable hepatic and renal safety profiles.
